IN THE UNITED STATES DISTRICT COURT  
FOR THE NORTHERN DISTRICT OF CALIFORNIA

United States District Court  
Northern District of California

AXEL BRAUN,  
  
Plaintiff,  
  
v.

PRIMARY DISTRIBUTOR DOE  
NUMBER 1, AND DEFENDANT DOES  
2 THROUGH 69,  
  
Defendant.

Case No.: 12-cv-3690 YGR (JSC)

**ORDER GRANTING EX PARTE  
APPLICATION FOR LEAVE TO  
TAKE EARLY DISCOVERY (Dkt. No.  
4)**

This case is one of scores of “mass copyright” cases filed in this District against hundreds of doe defendants accused of using BitTorrent technology to illegally download copyrighted files from the Internet. Plaintiff seeks limited discovery ex parte under Federal Rule of Civil Procedure (“FRCP”) 26(d) and FRCP 45 in order to discover the identities of the sixty-nine Doe Defendants named in this suit. (Dkt. No. 4.) For the reasons explained below, Plaintiff’s application is GRANTED.

**BACKGROUND**

1  
2 Plaintiff is an individual doing business as Axel Braun Productions, which produces  
3 adult entertainment products. (Dkt. No. 1 ¶¶ 9-10.) Plaintiff directed the video at issue –  
4 *Star Wars XXX: A Porn Parody* – which was produced by Axel Braun Productions and Vivid  
5 Entertainment, LLC. (Dkt. No. 4-1 ¶ 3.) The video was registered with the Copyright Office  
6 on February 21, 2012 in the name of Vivid Entertainment LLC & Axel Braun Productions.  
7 (Dkt. No. 4-2, Ex. A.)

8 Plaintiff alleges that Primary Distributor Doe Number One and Does Two through  
9 Sixty-Nine (collectively “Defendants”) used BitTorrent, an internet peer-to-peer (“P2P”) file  
10 sharing network, to illegally reproduce and distribute Plaintiff’s copyrighted work in violation  
11 of the Copyright Act, 17 U.S.C. § 101 et seq. (Dkt. No. 1 ¶¶ 31-35.) Plaintiff further alleges  
12 that by using the BitTorrent program to download and distribute Plaintiff’s content, each  
13 Defendant engaged in contributory infringement and is jointly and severally liable. (*Id.* at ¶¶  
14 36-45.)

15 The process by which file sharing occurs begins with P2P networks which are  
16 “computer systems that enable Internet users to make files on their computers available to  
17 others, search for files stored on other users’ computers, and transfer exact copies of files  
18 from one computer to another via the Internet.” (Dkt. No. 4-1 ¶ 7.) BitTorrent is a P2P  
19 network which allows “small computers with low bandwidths” to participate in “large data  
20 transfers across a P2P network.” (*Id.*) This process plays out as follows:

21 in a process called “seeding” an initial file-provider shares a file with P2P  
22 networks. Other users (“peers”) on the network connect to the seed file to  
23 download. Each new file downloader receives a different piece of data from  
24 each user who has already downloaded the file that together comprises the  
25 whole. This piecemeal system with multiple pieces of data coming from  
26 different peer members is called a “swarm.” As new peers request the same file,  
27 each new peer becomes a part of the network and the peers offer parts of the file  
28 stored on their computers to other peers. This means that every “node” or peer  
who has a copy of the infringing copyrighted material also becomes a source of  
download for that infringing file.

(Dkt. No. 4-1 ¶ 8.)

1 Plaintiff retained the services of Media Protector International GmbH (“MPI”), a  
2 technology company that specializing in P2P content detection and user identification to  
3 locate infringing copies of Plaintiff’s works on P2P networks. (Dkt. No. 4-1 ¶ 2.) MPI was  
4 able to identify and document internet protocol (“IP”) addresses from which individuals  
5 connected to the Internet, as well as the date and time the individuals used the IP addresses to  
6 share files on the P2P network. (Dkt. No. 4 at 11:1-12.) MPI determined that from 9:55 a.m.  
7 on April 1, 2012 to 10:13 p.m. on April 2, 2012, Doe One offered pieces of Plaintiff’s  
8 copyrighted work to other peers and Does Two through Sixty-Nine downloaded pieces of that  
9 file and engaged in simultaneous redistribution over the P2P network. (Dkt. No. 4-1 at Ex.  
10 A.)

11 Because Defendants’ conduct occurred behind the mask of their anonymous IP  
12 addresses, Plaintiff cannot identify the Defendants without leave to subpoena Defendants’  
13 internet service providers (“ISPs”) for the identity of the individual or entity related to each IP  
14 address. Based on the information obtained by MPI, including the specific date and time of  
15 download, Plaintiff alleges that the ISPs will be able to identify the name and address of each  
16 Doe Defendant. (Dkt. No. 4 at 11:12-14.) Consequently, Plaintiff asks the Court to grant  
17 expedited discovery to issue subpoenas to the relevant ISPs to require the ISPs to disclose the  
18 name, address, telephone number, and email address for each of Defendant’s IP address.

### 19 DISCUSSION

20 Federal Rule of Civil Procedure 26(d)(1) prohibits discovery without a court order  
21 prior to a Rule 26(f) conference between the parties. Courts generally use a “good cause”  
22 standard to decide whether to permit such early discovery. Semitool, Inc. v. Tokyo Electron  
23 America, Inc., 208 F.R.D. 273, 276 (N.D. Cal. 2002). “Good cause may be found where the  
24 need for expedited discovery, in consideration of the administration of justice, outweighs the  
25 prejudice of the responding party.” *Id.* at 276.

26 To determine whether there is “good cause” to permit expedited discovery to identify  
27 anonymous internet user doe defendants, courts consider whether:

28 (1) the plaintiff can identify the missing party with sufficient specificity such  
that the Court can determine that defendant is a real person or entity who could

1 be sued in federal court; (2) the plaintiff has identified all previous steps taken to  
2 locate the elusive defendant; (3) the plaintiff's suit against defendant could  
3 withstand a motion to dismiss; and (4) the plaintiff has demonstrated that there  
4 is a reasonable likelihood of being able to identify the defendant through  
5 discovery such that service of process would be possible.

6 OpenMind Solutions, Inc. v. Does 1-39, No. 11-3311, 2011 WL 4715200, at \*2 (N.D. Cal.  
7 Oct. 7, 2011) citing Columbia Ins. Co. v. seescandy.com, 185 F.R.D. 573, 578-80 (N.D. Cal.  
8 1999). The Court will consider each of these factors in turn.

9 **A. Identification of Defendants as Persons Who Can Be Sued**

10 Plaintiff has satisfied the first factor: whether Plaintiff has identified the Doe  
11 Defendants with sufficient specificity such that the Court can conclude that each Defendant is  
12 a real person or entity that would be subject to the Court's jurisdiction. First, Plaintiff  
13 represents that he has taken steps to ensure that the IP addresses accurately reflect addresses  
14 that were used to copy Plaintiff's copyrighted work. Second, Plaintiff also represents that he  
15 has used geolocation technology to trace the IP addresses of each Doe Defendant to  
16 California; in other words, Plaintiff has made a prima facie showing of personal jurisdiction  
17 over each Doe Defendant. See DigiProtect USA Corp. v. Does, 2011 WL 4444666 at \*1  
18 (S.D.N.Y. Sep. 26, 2011) (stating that "[p]ublicly available software provides basic, or at least  
19 presumptive, geographic information about IP addresses").

20 **B. Previous Steps Taken to Identify the Doe Defendants**

21 With respect to the second factor, Plaintiff has also identified the specific steps he has  
22 taken to identify the Doe Defendants and explained why he is unable to name and serve them  
23 at this time. Columbia Ins. Co., 185 F.R.D. at 579. As the Doe Defendants accessed  
24 Plaintiff's video via the Internet without any identifying information other than their unique  
25 IP addresses, Plaintiff is unable to further identify the Defendants without information from  
26 the ISPs.

27 **C. Withstanding a Motion to Dismiss**

28 The Court also concludes that Plaintiff has made a prima facie showing that the  
Complaint would withstand a motion to dismiss. To prevail on his copyright claim, Plaintiff  
must prove (1) that it owns a valid copyright, and (2) that each defendant copied a work

1 covered by the copyright. Online Policy Group v. Diebold, Inc., 337 F.Supp.2d 1195, 1199  
2 (N.D. Cal. Sep. 30, 2004). “To be liable for direct infringement, one must actively engage in  
3 and directly cause the copying.” Id. (internal quotation marks and citation omitted). Plaintiff  
4 has submitted evidence that his company is a co-claimant of the copyright for the video at  
5 issue. And he has alleged how and when each Doe Defendant intentionally copied the work,  
6 and has explained how he determined each identified IP address.

7 Plaintiff has also made a prima facie showing that the Complaint would withstand a  
8 motion to dismiss for lack of personal jurisdiction. The Complaint alleges that the ISP  
9 associated with each Doe Defendant is located in California; thus, the allegations of the  
10 Complaint support an inference that all of the Doe Defendants reside in California. At this  
11 stage in the proceedings, this is a sufficient showing.

12 Another issue frequently addressed by courts in these types of cases is whether the Doe  
13 Defendants are properly joined. Federal Rule of Civil Procedure 20 permits joinder of  
14 defendants in a single action if a right to relief is asserted against them “arising out of the  
15 same transaction, occurrence, or series of transactions or occurrences” and a “question of law  
16 or fact common to all defendants will arise in the action.” Fed. R. Civ. P. 20(a)(2)(A)(B).  
17 “[T]he impulse is toward entertaining the broadest possible scope of the action consistent  
18 with fairness to the parties; joinder of claims, parties and remedies is strongly encouraged.”  
19 United Mine Workers of America v. Gibbs, 383 U.S. 715, 724 (1966); see also League to  
20 Save Lake Tahoe Reg’l Planning Agency, 558 F.2d 914, 917 (9th Cir. 1997) (stating that the  
21 “primary purpose” of Rule 20 “is to promote trial convenience and to prevent multiple  
22 lawsuits”).

23 Plaintiff asserts that because all of the Doe Defendants were part of the same swarm  
24 downloading and distributing the same *Star Wars XXX: A Porn Parody* file during a limited  
25 thirty-six hour period of time, the copyright claims arise from the same transaction and  
26 occurrence and raise common issues of law and fact. While several courts have concluded  
27 that joinder is inappropriate under similar circumstances, see, e.g., Hard Drive Productions,  
28 Inc. v. Does 1-130, 2011 WL 5573960 (N.D. Cal. Nov. 16, 2011), the Court concludes that

1 Plaintiff has at least made a prima facie showing that the Doe Defendants are properly joined.  
2 See OpenMind Solutions, Inc., 2011 WL 4715200 at \*7 (concluding that plaintiff made a  
3 preliminary showing that satisfied Rule 20 given the allegations that the doe defendants were  
4 present in the same BitTorrent swarm and shared pieces of the same seed file). As the case  
5 progresses, the Court may conclude that it is unmanageable, depending on the number of  
6 defendants served and appearing, or that, in fact, the claims do not arise from the same  
7 transaction and occurrence. At this time, however, the Court is not persuaded that Plaintiff  
8 could not withstand a motion to dismiss for improper joinder.

9 **D. Likelihood of Identifying the Doe Defendants Through Discovery**

10 The final factor concerns whether the discovery sought will uncover the identities of  
11 the Doe Defendants. See Gillespie v. Civiletti, 629 F.2d 637, 642-43 (9th Cir. 1980) (stating  
12 that early discovery to identify doe defendants should be allowed “unless it is clear that  
13 discovery would not uncover the identities”); Wakefield v. Thompson, 177 F.3d 1160, 1163  
14 (9th Cir. 1999) (holding that “the plaintiff should be given an opportunity through discovery  
15 to identify the unknown defendants, unless it is clear that discovery would not uncover the  
16 identities”).

17 Here, this is a multi-step process. ISPs assign a unique IP address to each subscriber  
18 and retain subscriber activity records regarding the IP addresses assigned; thus, the  
19 information subpoenaed will reveal the name and contact information of the subscriber to the  
20 Internet connection that was used to download the copyrighted work, but it will not reveal  
21 who actually downloaded the work and therefore who can be named as a defendant. The  
22 Internet connection could have been used by the subscriber, by another member of the  
23 household, by a visitor to the household, or by someone secretly using an unsecure  
24 connection.

25 Plaintiff has proposed the following safeguards to protect the due process rights of  
26 these subscribers. First, upon receipt of the subpoena, the ISP shall provide the individual  
27 subscribers with a copy of the subpoena and a copy of this Order. The subscribers will then  
28 have thirty days to file a motion in this Court regarding the subpoenas, and only if the thirty-

1 day period passes without the subscriber contesting the subpoena shall the ISP provide the  
2 information responsive to the subpoena to Plaintiff. (Dkt. No. 4 p. 28-29.) Once identified,  
3 Plaintiff suggests that some of the Doe Defendants will likely be dismissed because Plaintiff  
4 cannot locate them, there are extenuating circumstances (presumably including the fact that  
5 that the subscriber was not the individual who allegedly downloaded the copyrighted work),  
6 or because the parties settle their claims without further litigation. (Dkt. No. 4 20:6-19.)

7 Given the foregoing, the Court concludes that it is not clear that requested early  
8 discovery, namely the subpoenas to the ISPs, will not lead to the discovery of the identities of  
9 the Doe Defendants. The Court recognizes that before granting such discovery it must weigh  
10 any prejudice to the responding party. In these circumstances, where Plaintiff has a good  
11 faith belief that the Doe Defendants reside in California, has submitted declarations outlining  
12 the steps it has taken to ensure that the identified Doe Defendants in fact downloaded  
13 Plaintiff's copyrighted material, and has limited its case to a narrow period of time, the Court  
14 concludes that good cause has been shown.

### 15 CONCLUSION

16 For the reasons stated above, the Court GRANTS Plaintiff's Ex Parte Application for  
17 Expedited Discovery (Dkt. No. 4) as follows:

18 Plaintiff is allowed to serve immediate discovery on Does 1-69's ISPs listed in  
19 Exhibit A to the Declaration of Michael Eichner (Dkt. No. 4-1) by serving a Rule 45  
20 subpoena that seeks information sufficient to identify the Doe Defendants, including the name  
21 and address of Does 1-69. Plaintiff's counsel shall issue the subpoena and attach a copy of  
22 this Order.

23 Each ISP will have 20 days from the date of service upon it to serve Does 1-69 with a  
24 copy of the subpoena and a copy of this Order. The ISPs may serve the Doe Defendants  
25 using any reasonable means, including written notice sent to his or her last known address,  
26 transmitted either by first-class mail or via overnight service.

27 Does 1-69 shall have 30 days from the date of service upon him, her, or it to file any  
28 motions in this Court contesting the subpoena (including a motion to quash or modify the

United States District Court

subpoena). If that 30-day period lapses without Does 1-69 contesting the subpoena, the ISP shall have 14 days to produce the information responsive to the subpoena to Plaintiff.

Because no appearance by a person at a deposition is required by the subpoena, instead only production of documents, records and the like is required, the witness and mileage fees required by Rule 45(b)(1) of the Federal Rules of Civil Procedure do not apply and no such fees need be tendered.

The subpoenaed entity shall preserve all subpoenaed information pending the ISP's delivering such information to Plaintiff or the final resolution of a timely filed and granted motion to quash the subpoena with respect to such information.

Any information disclosed to Plaintiff in response to a subpoena may be used by Plaintiff solely for the purpose of protecting its rights under the Copyright Act, 17 U.S.C. §§ 101-1322.

Plaintiff shall serve each Doe Defendant with the summons, complaint, and other documents required by Civil Local Rule 4-2 within 120 days of learning that Doe's identity.

Should Plaintiff engage in settlement negotiations with any Doe Defendant, it shall not assert that that Doe is being sued in San Francisco, unless Plaintiff believes that Doe to be a resident of this District or has a good faith belief, consistent with Federal Rule of Civil Procedure 11(b), that it can otherwise establish personal jurisdiction over that Doe in this District.

**IT IS SO ORDERED.**
